## Woolshed Coffee Roasters

Woolshed Coffee Roasters had humble beginnings in a woolshed in rural Australia. Symbolic of the golden era when Australia rode on the sheep's back, Woolshed Coffee is an exclusive but authentically Australian brand - genuine to its core.

Woolshed Coffee Roasters only use graded coffee with a score over 80, meaning all our coffee qualifies as being Specialty Grade. Quality is of utmost importance when roasting great tasting single origins and blends; and our guarantee to you is that we only use the best ram from the top paddock. We don't pull the wool over anyone's eyes!

Our single origin and filter coffees are roasted to maximise the flavour of the regions in which the coffee beans are grown.

We post blend our coffee, meaning that we roast each coffee by origin before mixing them together. This ensures each coffee is roasted to its individual and optimum specification.

It might be a bit slower and take a bit longer to get things right, but that's the way we do it down on the farm. We also enjoy a yarn or two along the way!

## Where will you find us?

You will find Woolshed Coffee served at high quality cafes, restaurants and bars. Our coffee is used by hard working baristas who genuinely care about what their customers want. They work hard all-day every-day pulling espresso shots and pouring milk-based coffees with passion and expertise.

## Single Origins and Blends

### Woolshed Single Origins

When you want a specific, not your average run of the mill coffee, with a particular one-off original taste then consider using one of our ever changing single origins.

### Woolshed Blends

#### 1st X

Like breeding to get a better progeny, our 1st X Blend combines various single origins for a bigger, better, bolder and more complex taste.

#### Working Dog

Everyone knows that a working dog is a loyal, faithful, hard-working friend who is always there for you. Our Working Dog blend is exactly that - the coffee you can count on to taste great day in day out. It's man's best friend!

## Training

No one wants a farm hand who can't cut the mustard, and you don't want a Barista that doesn't know their coffee, their machine or their craft. We deliver specific in-depth tailored training that puts Woolshed baristas ahead of the wool pack.

## Service

We have our very own delivery drivers, sales representatives, barista trainers, and technicians on call 24/7, 365 days of the year. We don't use outside third parties or contractors which gives us complete control, ensuring you can make hay while the sun shines, and won't be fleeced.

## Green Pastures

Most farmers take pride in the land they farm and understand that to make a living from it, a sustainable farming approach is required.

At Woolshed Roasters we embrace this sustainable philosophy and are serious about limiting our carbon footprint and changing the way we do things.

Our Sustainable Program sees us collect and recycle our coffee boxes, our coffee, chocolate and chai bags, as well as our spent coffee which we use to make awesome compost.

We are also committed to reducing plastic in our environment so you won't find us supplying plastic lined takeaway cups or plastic lids.

The cups we use are all single wall, made with paper from sustainable plantations which together with our lids breakdown once composted.
